Overview:

This course will offer ideas and examples of how to determine if your product portfolio is in line with what your market trends and/or your customer's demands, find alternatives, evaluate each alternative and promote the final solution to the executives. It also provides a proven template and project plan how to proceed forward.

Networking:

We strongly believe in the power of networking and in the concept of sharing openly and honestly various ideas and experiences. A special networking event will take place at the end of the day, from 5:30 pm until 7:30 pm. This is a great opportunity to connect with peers and exchange a few business cards.
